

JARROD J. SCOTT

an old-school naturalist using new-school tech

I study [microbial diversity](#). My approach is holistic, spanning [marine](#) & [terrestrial](#) systems to understand how simple organisms coalesce into complex communities & how these communities affect host biology, biogeochemical cycles, & ecosystem-level processes. I work to make research more accessible & exciting, transparent & reproducible. I use & teach open-source tools to create [web products](#) that communicate science more effectively.

RECENT TEACHING EXPERIENCE

All research cruises from 2012 - 2014 were to study the microbial ecology of deep-sea hydrothermal systems, specifically iron-oxidizing communities.

I've also worked on a lobster boat in Maine & a seine boat in Alaska.

A lot of my field experience in terrestrial systems is on fungus-growing ants in the Neotropics.
